

NuPay DebiCheck

There are two methods available for the use NuPay DebiCheck.

1. If a NuPay Terminal is available the Card and PIN can be used.
2. If no NuPay Terminal is available the authority will be given via the client's cell phone.

The method will be determined whether a Terminal ID is available or not.

Under the SETUP Menu option the necessary NuPay DebiCheck information needs to be completed. If there is more than one NuPay Terminal please enter the Terminal ID on each computer. The Terminal ID must be entered on the computer that has that terminal attached.

There are a few things that must be in place to ensure that DebiCheck will work correctly.

The client needs to do the following:

1. Ensure that he /she has complied with the necessary FICA rules.
2. Ensure that his / her cell phone number is registered against his / her bank account.
3. Ensure that the correct cell phone number is registered with the bank.

There are a lot of error codes so initially to get each client's information "acceptable" for DebiCheck it might take a bit of time. When a "request" is sent through and there is a problem an error code and error message will appear. The necessary action then needs to be taken.
